
The city is a community that must be united and uphold the rights of its residents.

That is why we are saying today:

We do not give our consent to the violation of women's rights, we do not agree to fundamentalism and limiting the freedom of female citizens.

Polish women want and have the right to decide about their lives.

The judgment of the Constitutional Tribunal on the restriction of the abortion law in Poland means condemning women to torture and is bringing pain and suffering.

The scale of the protests in recent days has shown that Polish men and Polish women, male and female residents of Krakow are ready to do a lot to defend their fundamental rights, even at risk of one's health and safety.

It is an extremely courageous action and an important voice of society that you should listen to!

We support women! Solidarity is our weapon!
